

## TECNIUM Process - MBT Sector (Municipal solid waste)

It's been more than **15 years** that TECNIUM was introduced in the municipal solid waste sector as a **supplier of turnkey projects** of the **ventilation and odor control installations** in this kind of plants. The collaboration with our customers allowed optimizing our initial designs in order to **minimize its economic, environmental and exploitation impacts**.

More than 20 national and international installations, with **flow up to 490.000 m<sup>3</sup>/h** guarantee our **technologist leadership** in Spain in this type of installations.

Facts such are our **own technology and experience**, several references in this sector, an only manufacturer for the all equipment allow us to propose **solutions completely adapted to our customer's needs**.

## ACHEMA 2012

Once that the Achema's last edition is finished, the **results** of the exhibition are very **positive** regarding the planned objectives.

Our new emplacement in the exhibition allowed us to introduce our **gas cleaning and odor control solutions** to many customers and sectors coming from many different geographic zones of the world. This fact will support us to **reinforce our ambitious international growth planning**.

Furthermore, the exhibition allowed us to consolidate our relationship with our international collaborators, that travelled to Frankfurt for this occasion.
