

FANS

SEALING SYSTEMS

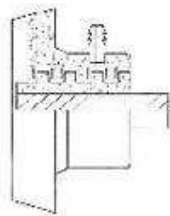

- **R (sealing ring):** 2 sealing rings of PTFE / Graphite over titanium or Ceramic sleeve, lubricated by grease.

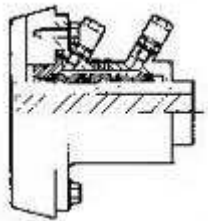

- **S (leak reducer):** leak limiter disc. There's no leakage at low inlet absolute pressure levels.

- **T (labirynth):** works through vacuum produced while fan is working. Only available for MP and MM models.

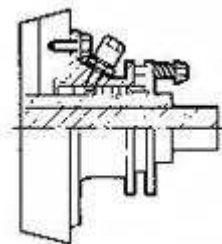

- **C (mechanical seal):** double external mechanical seal. External flushing required. System works also fan in stopped. Only available for MP and MM models.

i

- **E (automatic gasket):** with or without external flushing. Easy maintenance. Only available for MP and MM models.
