

TECNIUM NEWS

JANUARY-FEBRUARY 2012

## QUALITY CERTIFICATE ISO 9001

### WE WORK FOR OUR CUSTOMERS!

From the very first beginning **Tecnum** bet on a firm commitment for **quality** and **continuous improvement** of its products and services. For this reason in 1998, we became one of the first companies in the sector in obtaining the set up certificate of the quality system, according to **UNE-EN ISO 9001:1994 standard**. Recently we have renovated this commitment and we obtained the new certification of the quality system, adapted to the new **UNE-EN-ISO 9001:2008 standard**.

We keep on improving!

We keep on working to be leaders!

## TECNIUM PROCESS- BY-PRODUCT ASSESSMENT

Nowadays the recycling and **assessment of waste products** is vital to contribute to the sustainable development.

An important sector in this field is the **treatment and assessment of by-products** coming from farms, slaughterhouses and meat manufactures.

**The process of those waste materials provides** meat and bone meal and animal fat. Those are **high quality end products with a high value in the market**.

These processes produce odours and particles that Tecnum as a specialist on its treatment, can solve.

The **Tecnum's experience** in this kind of treatments allows us to suggest last generation technology solutions, **adapted to our clients' requests**.
