

TECNIUM

# TECNIUM Pumps

## MOTOBOMBAS

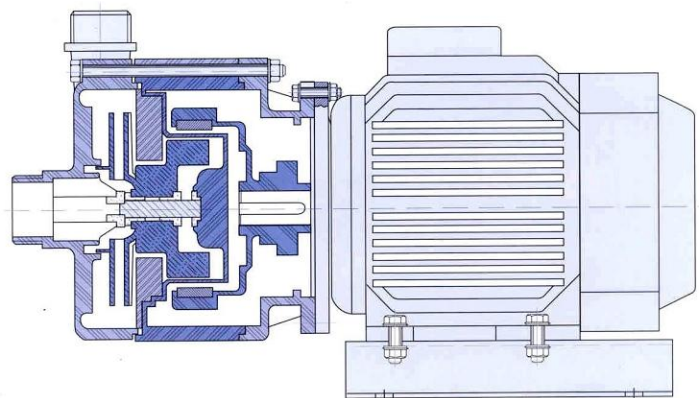

### SERIES BKM: Magnetic drive motor pumps

- Flow rate up to 50 m<sup>3</sup>/h (220 gpm).
- Total head up to 45 m.l.c. (135 ft).
- With a two axial directions self-alignment system, that allows the pump dry running capability.
- Built in solid plastic (PP or E-CTFE).
- In accordance with European directives of Safety on Machines CE.
- Optionally homologated  ATEX Categories 2 and 3.

#### MAIN ADVANTAGES:

- For their system of auto alignment of the impeller and their support on cases guide, the pump can work in dry conditions, without irreparable damages.
- Absolute tightness to the air.
- Without mechanical seal.
- Shaft in material of high purity (ceramic or silicon carbide, according to model).

Our stock of pieces allows the assistance in minimum times.

**TECNIUM, since 1957 optimizing industrial processes.**
